Assalamu'alaikum warahmatullah/Salam sejahtera.

I hope you had a great Raya break.

A week before Raya, DBKL briefed us on planned efforts to further reduce the possibility of flash floods at our KL Gate.

These include re-channelling water (run-offs) from the Institut Bahasa away from KL Gate (as opposed to the current situation where water from IB flows into UM), removing of mud (desiltation) from the sump located underneath the small roundabout immediately outside the gate, and removing the bottleneck near the intersection between both Sg Pantai and Sg Anak Batu - across our Faculty of Law. DBKL covers all costs but we will have to maintain these drains post improvements (please refer to the map below).

We are deeply appreciative of DBKL's efforts.

The point of this email - that widening of drainage - labelled 'Under capacity culvert to be increase in capacity discharge' on the map (left of the map) - will result in traffic disruptions which we will try to minimise. We have informed the Security Office in case there is a need for traffic diversion.

If you have any questions or feedback - please direct them to our engineers - Ir Suhaimi Khalis and Mr Zainuddin Borhan.

Thank you.
